

Find out what Murchison Green Hydrogen will look like from Kalbarri

We understand the visibility of the project's proposed wind turbines is of interest to community members, stakeholders and local residents.

The visualisations of the turbines from key locations in and around Kalbarri are now complete and are available on our website. The rest of the project's facilities, including the desalination plant, solar farm and green hydrogen and ammonia production plants, are not visible.

The images will show what will and won't be visible on an average day in the region.

There is also a new downloadable resource on our website showing how, why, and where we are locating the wind turbines.

[Visit our website to view the visualisation](#)
