

In this Project newsletter, we share a final update for 2024 including a wrap-up of engagement over the last 12 months and a lookahead at 2025.

What we heard from the community – December 2024

The MGH team held one-on-one community consultation sessions in the Kalbarri community earlier this month. These sessions provided an opportunity for individual community members to meet with Project representatives in person to learn more about the Project, ask questions and provide feedback.

To read about what we heard from the community during these sessions, click on the button below.

Looking back on 2024

In the December 2023 newsletter, the Project team provided a lookahead at the planned engagement for the year 2024. This included:

- A co-designed Community Benefit Sharing Framework (previously referred to as the Community Investment Program) with representatives from the local community
- Community information sessions
- Digital Project updates, resources and engagement

Below is an update on how we have delivered against these commitments:

Benefit Sharing Framework

- The Project invited expressions of interest to participate in the Advisory Group to all members of the community.
- All interested stakeholders were invited to attend the Group meetings that took place between June and September 2024 and informed the development of a draft Community Benefits Sharing Framework.
- The development of the framework was also informed by engagement with the Shire of Northampton.
- The draft will be open to wider community feedback in 2025.

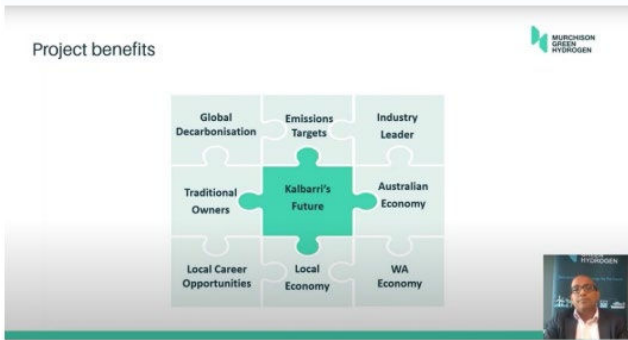

Kalbarri community drop-in session in March 2024

Community Information Sessions

The Project team held multiple community information sessions including:

- In-person drop-in sessions in Kalbarri, Northampton and Geraldton (you can view our What We Heard document summaries online).
- Two online community webinars (with recordings available on the Project website).
- A supplier information webinar hosted by ICN WA.

Digital Engagement

The Project has been building its digital database of informational resources:

- Fact Sheets on a variety of topics including:
 - Environment and planning approvals
 - Wind turbines
 - Minimising environmental impact
 - Green hydrogen and green ammonia
 - Mitigating impacts through project design
 - Offshore facilities
- Project at a glance
- Frequently Asked Questions page
- Industry and Project news webpage
- LinkedIn social media channel
- Newsletter updates (including web versions available online)
- Recordings of the live community webinars.
- Video depicting the visualisation of the Project's wind turbines

Community Support

The MGH team was a proud supporter of local initiatives and events, including the Kalbarri Lights Up Festival in June and the Mid West Chamber of Commerce and Industry's after-hours networking event in October.

General Project Updates

- The Project was awarded Major Project Status by the Federal Minister for Industry & Science in April.
- MGH was also a shortlisted Project for Hydrogen Headstart funding.
- The Project team submitted a change to its proposal to be assessed by the State and Federal environmental regulators (under section 43A (s 43A) of the EP Act and section 156A (s 156A) of the EPBC Act).
- The Project completed its environmental scoping document and all environmental survey work.

The data from this work is now being used to inform the environmental impact assessment.

- The Project has completed pre-FEED (front end engineering design).
- The project has executed offtake heads of agreements with two international counterparties.

Project Lookahead

The MGH Project team will continue to engage with the community and stakeholders, whilst progressing towards completion of environmental approval requirements.

A community meeting will be held in Kalbarri ahead of the four-week Public Environmental Review (PER) period in 2025. The PER will offer community members the opportunity to view the Environmental Review Document and submit feedback.

Message from Shohan Seneviratne, CEO of MGH

I would like to personally thank all of the community members and stakeholders for engaging with us over the last year. Your participation, insights and feedback have been informative and valuable to project decision making.

On behalf of the entire team, we'd like to wish you a safe and enjoyable holiday season and a happy New Year.

- Shohan Seneviratne, Chief Executive Officer
